

# Building Without Toxins

## Educating for a Healthy Material World

Friday, June 16, 2017, 1-4PM, FREE

A symposium to understand toxins in the built environment

Featuring panelists:

**Jennifer Atlee**, Sustainable Materials Consultant, PROSOCO & Principal at Atlee Research

**Julie Johnson**, Executive Director, Hitchcock Center for the Environment

**Kath McCusker**, LEED AP BD+C, Senior Sustainability Manager, Integrated Eco-Strategy

**Emily Monosson**, Toxicologist & Author, UMass Amherst

**Andrew Solem**, Living Building Challenge Materials Consultant, Wright Builders

**Jonathan Wright**, Principal, Wright Builders

Join materials, toxics, and living building experts for a conversation on hazardous Red List toxins in the built environment and how making toxic-free choices in materials is possible.

The afternoon will include panelist perspectives, a tour of featured materials in the Hitchcock Center's new Living Building, and time for questions and discussion with the panelists.
