

ANIMAL OBSERVATION SHEET

Try to observe the same animal three different days Here are some questions to think about while observing:

- What is the animal doing? Do you think this behavior is an adaptation? Does this behavior help the animal survive?
- What do you notice about the animal habitat?
- How does the animal move?
- How does the animal interact with others? What non living things does the animal interact with?

Day 1:	Day 2	Day3
